

Clean Part Clean Save

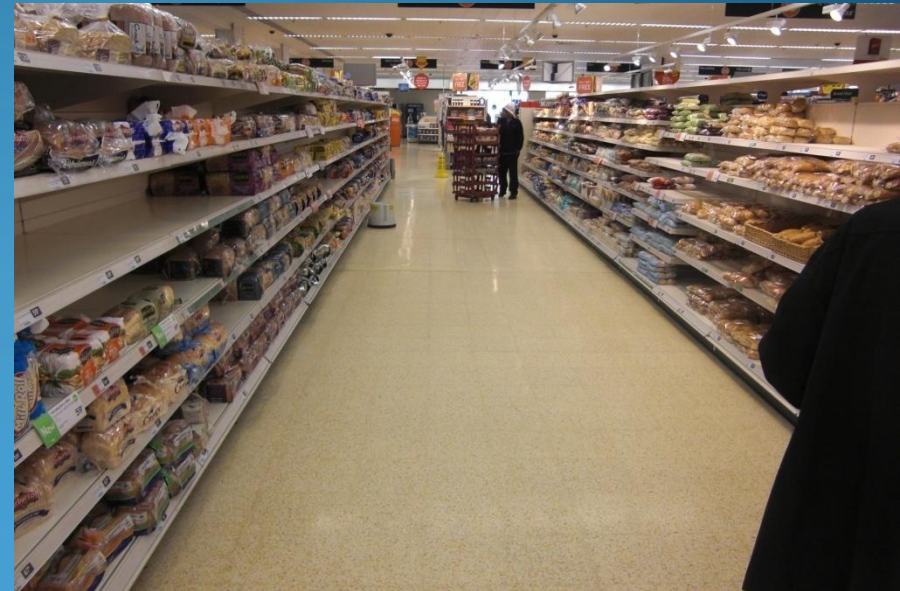

Clean Part Clean Save is a versatile system. It can be used dry or wet, on high speed machines or on regular auto scrubbers. Clean Part Clean Save uses very fine abrasive crystals as its cleaning medium. The crystal sizes are very carefully selected for each grade to allow Terrazzo, Natural stone or Manufactured stone and all polished concrete systems to be deep cleaned and then maintenance polished. All as a part of the regular cleaning system.

Clean Part

Clean Part Clean Save- 4 steps to a clean and shiny floor

1. Wet clean the floor with step 1. Dirt is removed and scratches are reduced. You get a clean surface.
2. Are you looking for a honey smooth surface? Use pad no. 2 and work across the floor 6 passed are enough.
3. Are you looking for a shiny look? Use pad no 3 and work the floor until the surface start to shine and the surface is even.
4. Are you looking for really high shine? Use pad 4 and repeat the previous procedure.
5. In daily cleaning you should use the pad representing the last step that you have used

Which floors can be cleaned with Clean Part Clean Save?

Marbel and Granite is very hard materials and are not possible to grind but it is possible to maintain an already shiny surface

Floor	Steg 1	Steg 2	Steg 3	Steg 4
